

28. (Amended) A portable golf computer comprising: [as defined in claim 25]

memory means for storing stroke, betting, and course data;

input means for inputting said stroke and betting data;

processor means for computing, based on said stroke, betting and course data, score(s)
and betting total(s); and

[wherein] said memory means also stores individual player handicap data.

Claim 53, line 9 change "processors" to -- processor --

Line 13 change "play" to -- played --

Amend claim 54 as follows:

54. (Amended) A portable golf computer comprising:

display means for displaying scenes representative of the geographic layout of a golf course;

memory means for storing data representative of said scene for each hole on the golf course;

said data stored in said memory means including data representative of different locations for each hole, including: (i) the entirety of said hole, (ii) the distance on the fairway between the current location and the hole and (iii) the green including said hole;

locator means which operates in conjunction with a signal means above the surface of and external of the fairway of the hole being played for determining the current location of the portable computer on the golf course; and

processor means, coupled to said display means, locator means and memory means, for causing said display means to display a selected one of the scenes of a particular hole which is representative of the geographic layout of the golf course, [which is] as determined by the current location of the portable computer on the golf course in conjunction with data representative of the current location on the particular hole.

In the Drawings

Substitute the attached formal drawings, figures 1-23, for the informal drawings submitted with the application.
